

The Weekly Graphic.

Dr. J. M. SWETNAM, - Proprietor.

SUBSCRIPTION:

Per Annum, in advance, \$1.50.

ADVERTISING RATES based on actual circulation at time of contract. For terms, estimates, etc., apply to W. M. GILL, Managing Editor.

Advertising Rates.

Equitable Advertising Rates based on actual circulation. The advertiser gets just what he pays for—no more, no less.

REGULAR COMMERCIAL ADVERTISING.

On three, six or twelve month contracts: One-fifth of one cent per line, on each hundred copies issued, during the insertion. Any number of changes made on payment of the extra cost of type setting. 10 lines (this type) to the inch. This advertisement occupies three inches down the column, and running 15 weeks, on an average circulation of say 500, would cost with one change of matter only \$4.50.

TRANSIENT AND LITERARY.—One month or less, at special rates.

Editorial Business Notices.—2 cents per line per hundred of circulation.

Local Business Notices.—1 cent per line per hundred of circulation.

Special Notices.—Minimum type, next to advertising columns. Local rates after first insertion.

Accurate record kept of each week's circulation, and charges graded accordingly.

REMEMBER.

That D. S. GUPE deals in all the best, and the **Smallest First Class Sewing Machine**, buys for Cash, and sells on his own account. He challenges **COMPETITION**, in any shape, either as to price or quality. Do not purchase of any one until you have given him a call, and avoid being imposed upon by worthless, rebuilt and second hand stock.

COPARTNERSHIP.—Dr. Swetnam has associated with himself in the practice of medicine, Dr. G. A. Goben. They will carry on the practice at Dr. Swetnam's old stand, and calls will be promptly attended to at all hours of the day or night.

TO THE PUBLIC.—The genuine Singer Sewing Machine can only be procured at the Singer Manufacturing Company's Office, opposite the post office. Other parties advertising genuine Singer Machines are selling worthless imitations. E. V. Bix, agent.

Manager Singer Mfg. Co's Office Kirkville.

The Platform.

[A large number of subscribers to the Graphic, who have not been taking any other republican paper, having been enrolled on our list since we published the platform as part of the proceedings of the convention, we re-publish it for their benefit.]

First. We affirm that the work of the last twenty-one years, has been such as to commend itself to the favor of the nation and that the fruits of the costly victories which we have achieved through immense difficulties should be preserved; that the peace regained should be cherished; that the disunion which we have happily restored should be perpetuated; and that the liberties secured to this generation should be transmitted undiminished to future generations; that the order established and the credit acquired should never be impaired; that the pensions promised should be paid; that the debt so much reduced should be extinguished by the full payment of every dollar thereof; that the reviving of industries should be further promoted; and that the commerce already so great should be steadily encouraged.

Second. The constitution of the United States is a supreme law and not a mere contract of the confederated states it made a sovereign nation, while others are denied to the states, but the boundary between the powers delegated and those reserved is to be determined by the national and not the state tribunals.

Third. The work of popular education is one left to the care of the several states but it is the duty of the national government to aid that work to the extent of its constitutional ability. The intelligence of the nation is the aggregate of the intelligence in the several states, and the destiny of the nation must be guarded, not by the genius of any one state but by the average genius of all.

Fourth. The constitution wisely forbids congress to make any law respecting an establishment of religion, but it is idle to hope the nation can be protected against the influence of sectarianism while each state is exposed to domination by the predominant sect. We recommend the constitution be so amended as to lay the same prohibition on the legislature of each state and to forbid the appropriation of public funds to the support of sectarian schools.

Fifth. We confirm the belief avowed in 1876 that the duties levied for the purpose of revenue should be discriminated as to favor American labor; that no further grant of the public domain should be made to any railway or other corporation; that slavery having perished in the states its twin barbarities, polygamy, must die in the territories; that every where the protection accorded to a citizen of American birth must be secured to citizens of American adoption; that we deem it the duty of congress to develop and improve our water courses and harbors; but that further subsidies to private persons or corporations must cease; that obligations of the republic to the men who preserved its integrity in the days of battle are undiminished by the lapse of fifteen years, since their final victory. Their perpetual honor is and shall forever be the grateful privilege and sacred duty of the American people.

Sixth. Since the authority to regulate immigration and intercourse between the United States and foreign nations rests with the congress of the United States and its treaty-making powers, the republican party regarding the unrestricted immigration of the Chinese as an evil of great magnitude, invoke the exercise of that power to restrain and limit that immigration by the enactment of such just, humane and reasonable provisions as will produce that result.

Seventh. That the purity and patriotism which characterized the early career of Rutherford B. Hayes in peace and war, and which guided the thought of our immediate predecessors to him for a presidential candidate, have continued to inspire him in his career as chief executive, and that his loyalty will assist in the administration of the honors which are due to an efficient, just and courteous discharge of the public business, and will honor his interpositions between the people and the proposed partisan laws.

Eighth. We charge upon the democratic party the habitual sacrifice of patriotism and justice to a supreme and insatiable lust of office and patronage; that of obtaining possession of the national and state governments, and the control of place, they have obstructed all efforts to purify, to conserve the freedom of suffrage, have devised fraudulent certificates and returns, have labored to unseat lawfully elected members of congress to secure at all hazards the vote of a majority of the states in the house of representatives, have endeavored to occupy by force and fraud the places of trust given to others by the people of Maine, and resorted to the outrageous action of her patriotic sons have by methods gross in principle and tyrannical in practice, attacked partisan legislation to the appropriation bills upon whose passage the very movements of the government depend; have crushed the right of the individual; have advocated the principles and sought the favor of rebellion against the nation and have endeavored to obliterate the sacred memories of the war and to revivify its pestilential influence; nationality, personal freedom and individual equality. The quiet, steady and complete enforcement of the laws and the protection of all our citizens in the enjoyment of all privileges and immunities guaranteed by the constitution are the first duties of the nation. The danger of successful anarchy can be averted by a faithful performance of every promise which the nation has made to the citizen. The execution of the laws and the punishment of all those who violate them are the only methods by which an enduring peace can be secured and genuine prosperity established throughout the south. Whatever promises the nation has made the nation must perform, and the nation will safely relocate this duty to the states. The solid south must be divided by the peaceful agencies of the ballot and all opinions must there find free expression, and to this end the honest voter must be protected against terrorism violence or fraud; and we affirm it to be the duty and purpose of the republican party to use all legitimate means to restore to all the states the union in the most harmonious way may be possible.

We submit to the practical, sensible people of the United States to say whether it would not be dangerous to the dearest interests of our country, at this time to surrender the administration of the national government to a party which seek to overthrow the constitution and to bring about a new

fire policy under which we were supposed to be thus bringing distrust and confusion where there is now order, confidence and hope.

Deaths from Political Excitement.

We hope the dear old daddy of the Democrat will read with care the following remark from the British Medical Journal, suggested by the occurrence of several sudden deaths in consequence of political excitement attending the recent elections in Great Britain.

It may save our illustrious editor to the democratic or the other party he is likely to join soon as an office is in sight.

They are quite *apropos* to the present political campaign in our own country: "The peculiar dangerous feature of electioneering excitement is, that it is commonly attended with undue exertion of the respiratory organs: long speeches and loud shouting and cheering, being the usual method of giving expression to political sentiments. It is quite possible that in some cases death may have been due to asphyxy caused by excited cardiac action in persons in advanced age, or in others in whom the walls of their brittle and degenerated cerebral arteries were unable to resist the strain to which they were subjected. But it is most probable that in the great majority of cases the sufferers were the victims of heart diseases, associated not unlikely with pulmonary troubles. In such cases, long speeches or excited cardiac action in persons in advanced age, or in others in whom the walls of their brittle and degenerated cerebral arteries were unable to resist the strain to which they were subjected. But it is most probable that in the great majority of cases the sufferers were the victims of heart diseases, associated not unlikely with pulmonary troubles. In such cases, long speeches or excited cardiac action in persons in advanced age, or in others in whom the walls of their brittle and degenerated cerebral arteries were unable to resist the strain to which they were subjected. But it is most probable that in the great majority of cases the sufferers were the victims of heart diseases, associated not unlikely with pulmonary troubles. In such cases, long speeches or excited cardiac action in persons in advanced age, or in others in whom the walls of their brittle and degenerated cerebral arteries were unable to resist the strain to which they were subjected. But it is most probable that in the great majority of cases the sufferers were the victims of heart diseases, associated not unlikely with pulmonary troubles. In such cases, long speeches or excited cardiac action in persons in advanced age, or in others in whom the walls of their brittle and degenerated cerebral arteries were unable to resist the strain to which they were subjected.
